PREFACE  This report is one in a series on Soviet Ground Force and logistic installations being prepared for a DIA/GIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Inelligence Division (NPIC), and the Production Center IPIC (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.  In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.  Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (F) OPL storage areas, (K) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (A) driver training areas, (N) tank/assuult gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity. Three storage depots are located approximately 22 kilometers (km) southwest of Cherkassy (Figure 1). The 3 depots are Cherkassy Ammo Depot No 2 Dubiyevka , Cherkassy Ammo Dump No 3 Dubiyevka and Cherkassy Ammo Depot Irdin PUG The proximity of the warehouse-type buildings to each other in the latter depot suggests a general storage rather than ammunition storage function as reported in the Bombing Encyclopedia.	The 3 installations cover a total of approximately 550 acres and contain 3 administration buildings, 10 barracks, 22 support buildings, 22 storage buildings, at least 26 probable ammunition storage buildings, and 2 probable athletic fields (Figures 2 and 3).  The areas were covered by missions between Comparative analysis reveals the same general level of usage and no change in facilities during this period.

has 3 sidings.  Road Service  The depots have secondary road connections to the Selma-Cherkassy highway.	Area F1 contains 8 probable ammunition storage buildings, 2 storage buildings, and one support building.  Area F2 contains at least 18 probable ammunition storage buildings and 5 support buildings located in a heavily wooded area. Foliage
Administrative and Troop Housing Areas	precludes a complete building count.
Area Dl contains 2 administration buildings, 5 barracks, and 7 support buildings.  Area D2 contains an administration building, 5 barracks, and 7 support buildings.	Athletic Fields  Areas K1 and K2 are athletic fields.
